

VNA Health Care—Right Care. Right Now. Right Here.

Many first-time VNA Health Care patients walk in for a free pregnancy test. And then they become patients for the long-term. They deliver their babies with us, bring their growing families back to VNA for care, and continue to care for their own health as they complete their families and get older.

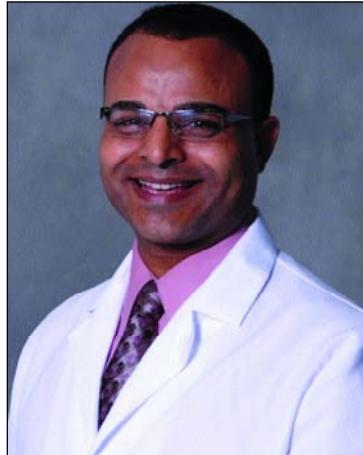

VNA's philosophy of care focuses on the complete picture of a person's health while ensuring that all patients have convenient access to care and a choice of providers. VNA has two convenient locations in Elgin to choose from—on the west side of town, VNA is located at 620 Wing St. in the Well Child building. On the east side of town, VNA is located in its own building at 801 Villa St., across from Bowlway and the Fire Station.

VNA has deep roots in the Elgin community. The organization known as 'The Elgin Visiting Nurse Association' merged with the Visiting Nurse Association in Aurora in 1986, and the name was changed to "Visiting Nurse Association of Fox Valley". In 2011, the organization changed its name again to "VNA Health Care". This change honors its historical roots as a "VNA" and reflects the fact that the organization has become a full-service, primary health care provider in addition to offering nursing focused health services in the home.

Today, VNA Health Care provides affordable health care to over 55,000 men, women and children living primarily in Kane, DuPage and Will counties. VNA has nine community health centers located in Elgin, Aurora, Bensenville, Carol Stream, Bolingbrook and Romeoville. VNA's combination of convenience (by appointment or walk-in), patient-centered technology and expert care delivered with respect and compassion have led to its national ranking as a top performing health center.

As a grant-funded "Get Covered Illinois" partner organization, VNA has Certified Navigators on staff to provide free assistance with Insurance Marketplace and Medicaid enrollment. VNA's Navigators continue to enroll consumers in Medicaid, which is open for enrollment year-round, and provide assistance to those who may become eligible for a Special Enrollment Period for the Marketplace. The next open enrollment period for the Illinois Marketplace will begin on Nov. 15, 2014, and run through Feb. 15, 2015.

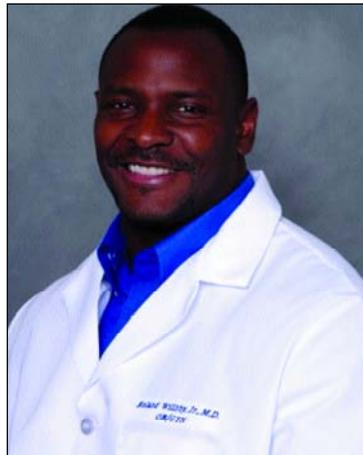

VNA is a Medicaid & Medicare Certified Agency; accepting Medicaid/Public Aid Card, Blue Cross Blue Shield Blue Advantage, Blue Precision, and HMO Illinois plans, Harmony, most PPOs, and other plans. VNA is accredited by The Joint Commission.

"It is our goal to make sure our patients feel respected, cared for, and well-informed. This has led to a more than 95 percent patient satisfaction rate over the past five years and to significant growth for VNA Health Care."

Fadel Azer, MD

Medical Director for VNA Health Care

"My lifelong dream was to become a physician and provide my services to the poor and underserved. I grew up in the inner city of Chicago and went to a clinic similar to the VNA."

Roland Williby Jr., MD

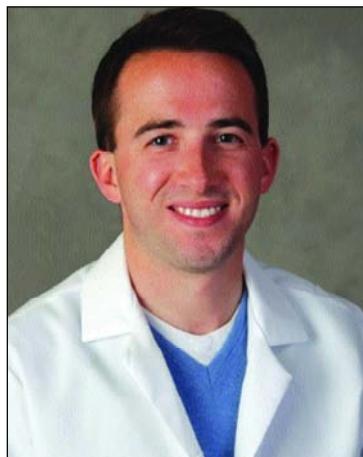

Obstetrician/Gynecologist

"I believe that all people deserve quality health care and education about their health. As a nurse-midwife, I strive to give high quality healthcare and educate women about their bodies so they can make good health care choices. I firmly believe that if a person understands the reason for the recommendations I make, they are more likely to follow my directions."

Sherri Wiley-Benson, RN, CNM, MSN

Nurse-Midwife

"I love working with children. Every smile and giggle makes each visit that much more satisfying. I enjoy comforting children who might be a little scared about visiting the clinic. If I can make them laugh, I think it makes their visit a little easier. I also think it is very important to begin education on the importance of health and healthy lifestyles at a young age."

Dan Cohen, RN, MS

Pediatric Nurse Practitioner
